HOME SHIELD

Integra

Professional protection

against crawling insects
(mites, ants, cockroaches, silverfish,
Woodlice, fleas, greenflies.).

For domestic animals, birds,
pigeons, plants and garden.

- **Home Shield** is non-toxic.
- Insects that come into contact with **Home Shield** dehydrate within 24 hours.
- **Home Shield** has an immediate and long-term effect.
- It has a **PHYSICAL** mode of action and is not chemically or biologically active.
- To be sprayed in corners, fissures and resting or sleeping areas. (Preferably not directly on the animals)

Home Shield's fine powder is applied by pointing the nozzle at the area effected and applying until a layer formed.

Home Shield is a non-soluble product, remaining dry and effective over long periods.

Way of action:

Home Shield attacks insects in an entirely physical way, perforating their protective waxy outer layer and causing them to "dry out".

On request a copy of the safety data sheet will be send.
